FLUKE networks

Hall: **2**

Stand: **2B4**

Twenty five years ago, Fluke Corporation instituted a new program for innovation, built around carefully selected groups called Phoenix Teams. Each was given 100 days and \$100,000 to do something remarkably simple: watch how customers work, analyze the problems they face and turn those insights into new businesses. After spending days with harried networking technicians, the original team had an epiphany: there was no easy way to determine whether network problems were related to hardware, software or cabling. So they created a new way. Today Fluke helps simplify troubleshooting of complex networks with products that provide deep visibility and uncover previously unseen problems.

Noventiq

Hall: **2**

Stand: **2E1**

Noventiq is a leading global solutions and services provider in digital transformation, cybersecurity and artificial intelligence, headquartered in London, and established more than thirty years ago. The company enables digital transformation for its customers' businesses, connecting organizations across a comprehensive range of industries with best-in-class Information Technology vendors, alongside its own services and solutions. The company's rapid growth is underpinned by its three-dimensional strategy to expand its market penetration, product portfolio, and sales channels. This is supported by an active approach to M&A, positioning Noventiq to capitalize on the industry's ongoing consolidation. With around 6,400 employees globally, Noventiq operates in approximately 60 countries with significant growth potential in multiple regions including LATAM, EMEA and APAC. Noventiq has realized the strategic importance for Egypt, and three years ago, it has acquired a local company - called DigiTech back then, a solutions and services provider for digital transformation. The acquired company - rebranded recently to Noventiq Egypt, is bringing the global expertise of the group to produce local outcomes for customers in Egypt. On another dimension, the technical team is evolving and integrating within the group's other global delivery centers to serve the region in growing number of areas of expertise.

VAS Integrated Solutions is a value-added distributor specializing in integrated IT solutions across various market sectors. As a subsidiary of Giza Systems—a prominent digital transformation enabler in the MEA region—VAS has established itself as a leading player in the industry since its acquisition in 2014 from Groupe Bull. With a proven track record in Egypt, Libya and KSA, VAS excels in delivering exceptional services in data centers, virtualization, cloud enablement, middleware, security, and network infrastructure. The company represents the full portfolio of Dell Technologies, Fortinet, VMware(Broadcom), and Nutanix. Founded in 2006, VAS has developed essential business infrastructures that empower clients to enhance their core operations, reduce costs, and optimize performance. Its global footprint for VMware services spans Egypt, the USA, Canada, the UK, and several other countries, underscoring its commitment to supporting clients worldwide.

Arab Organization for Industrialization (AOI)

Hall: **3**

Stand: **3C2**

Arab Organization for Industrialization (AOI) was established in 1975 between four Arab countries (Egypt, Saudi Arabia, the Emirates and Qatar) for the development of advanced technology – based industries in the Arab World. In 1979 Egypt took full control over AOI. AOI wholly owns twelve factories, including: Aircraft Factory – Engine Factory – Sakr Factory for Developed Industries – Railway Equipment Factory (SEMAF) – Electronics Factory – Helwan Factory for Developed Industries – Arab British Dynamics (ABD) – Arab Timber Industries Company (ATICO) – Arab Renewable Energy Company (ARECO) – African Company for medical industries. In addition to the larger share in one joint venture namely the Arab American Vehicles Company (AAV), with Fiat-Chrysler. Fields of Activity: (AOI) operations include both military and civil activities, fulfilling the requirements of the Armed Forces of Egypt, Arab States, and friendly countries. It also supports societal development plans, with emphasis on infrastructure, ecological protection, and railway projects. Capabilities of AOI: AOI has more than 15,000 skilled workers trained at AOI centers as well as many specialized institutes inside Egypt and abroad. AOI applies the latest industrial technologies and advanced laboratory equipment in support of engineering industries in addition to calibration laboratories, specialized research centers and integrated quality systems.

Abu Dhabi Islamic Bank, Egypt - ADIB

Hall: **1**

Stand: **1B6**

ADIB-Egypt is an award-winning bank that began operations in 2007. The bank focuses on providing a wide range of modern, Sharia-compliant financial solutions, supported by a highly skilled and well-trained team, along with a robust network of 71 branches and over 100 ATMs widespread across Egypt. To keep pace with rapid technological advancements, ADIB Egypt prioritizes digital services, enhancing internet banking, ATMs, and mobile applications. It also updated branch reservation systems to better serve individuals with special needs and improved ATM user interfaces. Additionally, ADIB-Egypt established ADI Capital for investment banking, ADIFinance for leasing, and an asset management division. In 2020, ADIB launched ADI Microfinance and ADI Consumer Finance to meet the growing needs of its customers. In 2023, the bank excelled by winning 37 global awards, including titles for Best Islamic Bank and Best Digital Bank, alongside recognition for its corporate social responsibility initiatives.

Commercial International Bank - CIB Egypt

Hall: **1**

Stand: **1A7**

CIB is the leading private-sector bank in Egypt, offering a broad range of financial products and services to its customers, which include more than 500 of Egypt's largest corporations, enterprises of all sizes, institutions, and households. CIB's strong brand and growth in retail and SME banking segments continues to introduce new customers to the bank. As a result, CIB has succeeded in becoming the most profitable commercial bank operating in Egypt for more than 40 years. The Bank was founded in 1975 as Chase National Bank, a joint venture between Chase Manhattan Bank and the National Bank of Egypt (NBE). In 1987, Chase divested its stake to NBE, who renamed the former joint venture Commercial International Bank. Over time, NBE's ownership in CIB declined, and in 2006 a consortium led by Ripplewood Holdings acquired NBE's remaining 19%. In 2009, Actis, a Pan-African private equity firm specializing in emerging markets, acquired 50% of Ripplewood Consortium's stake and became CIB's single largest shareholder, with a 9.06% stake. The emergence of Actis as CIB's predominant shareholder marked a key transition in the bank's strategic relationships. In March 2014, Actis divested 2.6% of its stake in CIB on the open market, maintaining its seat on the board, and in May of that year, sold its remaining stake to several wholly-owned subsidiaries of Fairfax Financial Holdings. Fairfax Financial Holdings owns through its wholly-owned subsidiaries a total of 6.55% of CIB's shares, making it the only strategic shareholder in CIB. Their interests in CIB are represented with one Board seat on the Bank's Board of Directors.

BUC Business Incubator for Smart Green Technology

Hall: **5**

Humanity is now preparing for new challenges, and in Egypt, there is a grand vision that places the protection of health and the environment of the Egyptian people at the forefront of the decision-makers' concerns. Therefore, a contract was signed with the Academy of Scientific Research and Technology for the "Incubators Program" launched in 2021, with full support and assistance from the Academy. In November 2021, Professor Dr. Mahmoud Sakr, President of the Academy, launched Badr University's Incubator in Cairo, specializing in green technology and health, and opened the door for applications to the incubator. The Badr University Incubator offers three cycles over three years, with each cycle lasting one year and incubating five companies each year. A total of 58 companies applied for the first cycle, with the opportunity for each company to present their ideas. After a selection process, 18 companies were shortlisted for the pre-incubation phase.

GREENSHIELD

Hall: **5**

The proposed business, GREENSHIELD, offers an AI-powered weeding robot designed to provide precise and eco-friendly weed management solutions. Our product targets farmers specializing in medicinal, aromatic, and organic crops, who require sustainable and efficient weed control methods. The robot employs advanced AI algorithms for weed detection and removal, minimizing the need for manual labor and chemical herbicides. Our primary customers include organic farmers, medicinal plant growers, and agricultural enterprises looking to enhance productivity and sustainability. The ownership of GREENSHIELD lies with a dedicated team of experts in agricultural technology, software development, and sustainable farming practices. The future of GREENSHIELD is promising as the demand for sustainable agricultural solutions continues to grow. With increasing awareness of environmental preservation and health concerns, our product is well-positioned to meet market needs. We envision expanding our market reach, refining our technology, and forming strategic partnerships to drive the adoption of our weeding robot on a global scale. Our long-term goal is to revolutionize weed management, contribute to sustainable farming, and support farmers in optimizing crop health and yield. The agricultural industry is poised for significant technological advancements, and GREENSHIELD is at the forefront of this transformative journey.

Telecom Egypt

Hall: **5**

Telecom Egypt is a total telecom operator in Egypt and the first to acquire the 5G license, providing a wide array of telecom services to a diverse customer base. Serving individuals, communities, SOHOs, SMEs and large enterprises, Telecom Egypt offers a comprehensive, innovative, and diversified portfolio of services, ranging from fixed and mobile voice to essential data solutions that are crucial in today's digital landscape. These services also include high-speed internet, smart solutions, data center facilities, and cloud computing solutions tailored for businesses. With a rich heritage of about 170 years, Telecom Egypt continues to lead the Egyptian telecom market by providing cutting-edge technology, robust infrastructure, and an extensive network of subsea cables to meet the needs of its enterprise and consumer clientele. The company's pivotal role in Egypt's telecommunications landscape is underscored by its expansive network coverage, broad service range, and dedication to fostering innovation.
